## DAILY WAGE LABOUR — STANDARD OPERATING PROCEDURES

Carpenters & Polish Labour | Work Tracking | Tools | Wages | KPIs

|                |                                                             |
|----------------|-------------------------------------------------------------|
| Document Code  | ATI-LSOP-2025                                               |
| Applies To     | All Daily Wage Carpenters and Polish Labourers              |
| Working Hours  | 7:00 AM to 7:00 PM (12 hours) = 1.5x Daily Wage Rate        |
| Departments    | Modular Furniture (Raees)   Custom Wood Furniture (Shafeer) |
| Overseen By    | Afsal (Admin & Project Coordinator)   Director (Yaseen)     |
| Effective Date | 18 June 2026                                                |
| Version        | 1.0 — Review Annually                                       |

This SOP governs all aspects of daily wage labour management at Appletree Interiors factory — from morning attendance to evening output reporting, tool accountability, material usage tracking, wage calculation, and advance payment control. Carpenters and polish labourers are the production backbone of Appletree Interiors and this document ensures they are managed, supported, and fairly compensated with complete transparency.

ATI-LSOP-2025 | SECTION 1 — LABOUR REGISTER & CLASSIFICATION

1.1 Labour Categories

| Category         | Skill Level     | Primary Tasks                                         | Daily Rate Basis |
|------------------|-----------------|-------------------------------------------------------|------------------|
| Master Carpenter | Senior / Expert | Furniture assembly, joinery, complex cutting, fitting | Premium rate     |
| Carpenter        | Skilled         | Cabinet assembly, cutting, drilling, edge banding     | Standard rate    |
| Carpenter Helper | Semi-skilled    | Material handling, rough cutting, sanding support     | Helper rate      |
| Master Polisher  | Senior / Expert | PU finish, melamine polish, charcoal finish, staining | Premium rate     |
| Polish Labour    | Skilled         | Sanding, sealer application, polish coats             | Standard rate    |
| Polish Helper    | Semi-skilled    | Surface prep, cleaning, masking, material movement    | Helper rate      |

1.2 Labour Register Format

Raees and Shafeer maintain a Labour Register for their department. Every daily wage worker must be registered before beginning work. Register contains:

| Field               | Details                                                                                 |
|---------------------|-----------------------------------------------------------------------------------------|
| Labour ID           | Unique ID — e.g. ATI-C001 (Carpenter), ATI-P001 (Polisher)                              |
| Full Name           | As per government ID                                                                    |
| Category            | Master Carpenter / Carpenter / Helper / Master Polisher / Polish Labour / Polish Helper |
| Department          | Modular (MOD) / Custom Wood (CWF)                                                       |
| Standard Daily Rate | Base wage agreed — in INR                                                               |
| Overtime Rate       | 1.5x daily rate for 7AM–7PM shift                                                       |
| Bank Account / UPI  | For wage transfer                                                                       |
| Emergency Contact   | Name and phone number                                                                   |
| ID Proof            | Aadhaar / Voter ID reference                                                            |
| Joining Date        | Date first engaged                                                                      |

■ No unregistered labour is permitted to work on the factory floor. Raees / Shafeer responsible for ensuring all workers are registered before first day of work.

## ATI-LSOP-2025 | SOP-L01 — DAILY ATTENDANCE TRACKING

### Purpose

To record accurate daily attendance for all daily wage workers — the foundation of correct wage calculation, productivity tracking, and project cost allocation.

### Responsible

- Recording: Raees (MOD Dept) / Shafeer (CWF Dept)
- Verification: Afsal (Admin & Project Coordinator)
- Payroll Use: Basith (Accounts Head)

### Attendance Rules

| Status                | Definition                             | Wage Payable                      | Noted As |
|-----------------------|----------------------------------------|-----------------------------------|----------|
| Present — Full Day    | In by 7:00 AM, out by 7:00 PM (12 hrs) | Full daily wage x 1.5             | P        |
| Present — Half Day    | Present for 6 hours or less            | Half daily wage                   | H        |
| Absent                | Not present                            | Zero                              | A        |
| Late Arrival          | In after 7:30 AM                       | Deduction at dept head discretion | P-L      |
| Early Leave           | Left before 6:00 PM                    | Deduction at dept head discretion | P-E      |
| On Leave — Approved   | Pre-approved leave                     | As per agreement                  | L        |
| On Leave — Unapproved | Absent without notice                  | Zero — flagged                    | UA       |

### Attendance Recording Procedure

|                                                                                                                                                                                           |                                   |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------|
| 7:00 AM                                                                                                                                                                                   | <b>Attendance Roll Call</b>       |
| Raees and Shafeer call roll at 7:00 AM sharp. Every worker present answers. Status marked immediately in the Attendance Register (ATI-LF01). No grace period — 7:00 AM is the start time. |                                   |
| 7:05 AM                                                                                                                                                                                   | <b>Attendance Register Update</b> |
| Status entered for each registered worker: P / H / A / P-L / P-E / L / UA. Dept Head signs the register for that day.                                                                     |                                   |
| 7:00 PM                                                                                                                                                                                   | <b>Sign-Out</b>                   |
| Workers sign out in the Attendance Register at end of shift. Dept Head confirms all workers have signed out before leaving.                                                               |                                   |
| 7:15 PM                                                                                                                                                                                   | <b>Daily Report to Afsal</b>      |
| Raees and Shafeer submit the daily attendance count to Afsal via WhatsApp or physical register: Total Present, Absent, Half Day — per department.                                         |                                   |

Weekly Attendance Summary

Every Monday, Afsal prepares a weekly attendance summary for the previous week:

| Labour ID | Name   | Mon | Tue | Wed | Thu | Fri | Sat | Total Days | Remarks            |
|-----------|--------|-----|-----|-----|-----|-----|-----|------------|--------------------|
| ATI-C001  | [Name] | P   | P   | A   | P   | P   | P   | 5          | —                  |
| ATI-P001  | [Name] | P   | H   | P   | P   | L   | P   | 4.5        | Approved leave Tue |

■ Attendance register is the primary legal document for wage disputes. It must be maintained accurately, signed daily by the Dept Head, and preserved for minimum 2 years.

ATI-LF01 — Daily Attendance Register

|                           |  |
|---------------------------|--|
| Date:                     |  |
| Department (MOD / CWF):   |  |
| Dept Head:                |  |
| Total Registered Workers: |  |
| Total Present:            |  |
| Total Absent:             |  |
| Total Half Day:           |  |
| Signature of Dept Head:   |  |

ATI-LSOP-2025 | SOP-L02 — MORNING TASK ALLOCATION

Purpose

To assign every present worker a specific task, product, and project at the start of each shift — ensuring no worker is idle, all tasks are tracked, and production targets are met.

Procedure

|                                                                                                                                                                                                                              |                      |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------|
| 7:00 AM                                                                                                                                                                                                                      | Attendance Completed |
| Dept Head confirms who is present for the day.                                                                                                                                                                               |                      |
| 7:15 AM                                                                                                                                                                                                                      | Task Briefing        |
| Raees / Shafeer conducts individual task briefing for each worker. Every worker is told: Project Code, Product Name, Task (e.g. Assembly / Cutting / Polishing), Drawing reference if applicable, Target output for the day. |                      |
| 7:30 AM                                                                                                                                                                                                                      | Task Card Issued     |
| Each worker receives or is verbally assigned their Task Card (ATI-LF02). The card stays with the worker throughout the day. Workers do NOT move to another task without informing the Dept Head.                             |                      |
| During Day                                                                                                                                                                                                                   | Task Change Protocol |
| If a task must change mid-day (material unavailable, drawing issue), Dept Head updates the Task Card and notes the reason. No unauthorised task switching.                                                                   |                      |
| 5:00 PM                                                                                                                                                                                                                      | Progress Check       |
| Dept Head walks the floor — checks actual progress vs morning target. Provides support or re-allocates if target is at risk.                                                                                                 |                      |

Task Card Format — ATI-LF02

Task Card (Issued to each worker daily)

|                    |  |
|--------------------|--|
| Date:              |  |
| Labour ID & Name:  |  |
| Department:        |  |
| Project Code:      |  |
| Client Name:       |  |
| Product / Item:    |  |
| Task Description:  |  |
| Drawing Reference: |  |

|                                       |  |
|---------------------------------------|--|
| Morning Target (qty/stage):           |  |
| Actual Output (filled at end of day): |  |
| Remarks:                              |  |
| Dept Head Signature:                  |  |

■ Task Cards must be collected by the Dept Head at end of every day. They form the basis of the daily production report and worker performance record.

ATI-LSOP-2025 | SOP-L03 — WORK TRACKING: PRODUCT & PROJECT

Purpose

To maintain a clear, real-time record of which worker is working on which product of which project — enabling accurate project cost tracking, labour allocation efficiency, and accountability.

Project-Labour Linkage System

Every active project has a Project Code assigned by Afsal at kickoff. All labour work must be linked to a Project Code. No work is done without a project reference.

| Project Code Format                 | Example       | Components                                                              |
|-------------------------------------|---------------|-------------------------------------------------------------------------|
| ATI-[Year]-[SeqNo]-[ClientInitials] | ATI-25-047-HB | ATI = Appletree Interiors   25 = Year   047 = Project No.   HB = Habeeb |

Daily Labour Allocation Board

Raees and Shafeer maintain a physical Labour Allocation Board on the factory floor — updated every morning by 7:30 AM:

| Labour ID | Name   | Category         | Project Code  | Product         | Task                      | Target     |
|-----------|--------|------------------|---------------|-----------------|---------------------------|------------|
| ATI-C001  | Rahman | Master Carpenter | ATI-25-047-HB | Modular Kitchen | Assembly — Upper Cabinets | 4 units    |
| ATI-C002  | Suresh | Carpenter        | ATI-25-047-HB | Wardrobe Unit 1 | Cutting & Edge Band       | 6 panels   |
| ATI-P001  | Ajith  | Master Polisher  | ATI-25-041-MR | TV Unit         | PU Final Coat             | 2 coats    |
| ATI-C003  | Biju   | Carpenter Helper | ATI-25-047-HB | Kitchen         | Sanding & Material Prep   | All panels |

Multi-Project Day Tracking

When a worker works on more than one project in a single day, both are recorded. Labour cost is split proportionally:

| Time Block         | Project Code  | Product         | Task               | Hours | Labour Cost Allocated   |
|--------------------|---------------|-----------------|--------------------|-------|-------------------------|
| 7:00 AM – 12:00 PM | ATI-25-047-HB | Modular Kitchen | Assembly           | 5 hrs | 5/12 x Daily Wage x 1.5 |
| 1:00 PM – 7:00 PM  | ATI-25-041-MR | TV Unit         | Assembly + Fitting | 6 hrs | 6/12 x Daily Wage x 1.5 |

■ Multi-project days must be recorded accurately — this directly affects project profitability reports reviewed by Basith and the Director.

Monthly Labour Cost Per Project Report

Basith prepares a monthly Labour Cost Per Project report using Task Cards and Attendance Register data:

| Project Code  | Total Labour Days | Total Labour Cost | Budget Labour Cost | Variance |
|---------------|-------------------|-------------------|--------------------|----------|
| ATI-25-047-HB | 42 days           | ■XX,XXX           | ■XX,XXX            | ±X%      |
| ATI-25-041-MR | 18 days           | ■XX,XXX           | ■XX,XXX            | ±X%      |

ATI-LSOP-2025 | SOP-L04 — MATERIAL USAGE TRACKING

Purpose

To track exactly which materials are consumed by each worker on each product and project — preventing wastage, enabling accurate project costing, and holding workers accountable for material usage.

Material Issue to Worker

|                                                                                                                                                                          |                               |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------|
| Step 1                                                                                                                                                                   | Material Request by Dept Head |
| Raees / Shafeer raises a Material Issue Slip (ATI-F05) for all materials needed for the day's tasks — specifying project code and product.                               |                               |
| Step 2                                                                                                                                                                   | Vibin Issues Materials        |
| Vibin issues exact quantities after Afsal's approval. Materials are counted and recorded before handover.                                                                |                               |
| Step 3                                                                                                                                                                   | Worker Acknowledgement        |
| The carpenter or polisher who receives materials signs the Material Issue Slip against their name and Labour ID. They are accountable for the materials from this point. |                               |
| Step 4                                                                                                                                                                   | Material Usage Log            |
| Dept Head records material consumption per worker per task during the day in the Material Usage Log (ATI-LF03).                                                          |                               |
| Step 5                                                                                                                                                                   | End-of-Day Return             |
| Any leftover materials are returned to Vibin with a Material Return Note. Unused materials must NOT be stored on the factory floor overnight.                            |                               |
| Step 6                                                                                                                                                                   | Wastage Recording             |
| Cutoffs, defective sheets, and damaged materials are recorded separately in the Wastage Log (ATI-LF04). Dept Head signs off on wastage — excess wastage is investigated. |                               |

Material Usage Log — ATI-LF03

| Date  | Labour ID | Name   | Project Code | Product | Material | Qty Issued | Qty Used | Qty Returned | Wastage | Remarks         |
|-------|-----------|--------|--------------|---------|----------|------------|----------|--------------|---------|-----------------|
| DD/MM | ATI-C001  | Rahman | ATI-25-047   | Kitchen | 19mm Ply | 8 sheets   | 7 sheets | 0            | 1 sheet | Cutoff — logged |

Material Accountability Rules

- Every sheet of plywood, HDHMR, PVC issued to a worker is tracked by name and project.
- Laminate sheets: tracked by colour code and quantity per project.
- Hardware (hinges, channels, handles): issued by count. Every unused piece returned.
- Paint / Polish: issued by weight or volume. Remaining quantity weighed back at end of day.
- Thinner, sandpaper, masking tape: tracked as consumables — monthly usage report prepared.

Wastage Standards

| Material          | Acceptable Wastage  | Action if Exceeded               |
|-------------------|---------------------|----------------------------------|
| 18/19mm Plywood   | Max 8% per project  | Investigate — report to Director |
| HDHMR / PVC Board | Max 6% per project  | Investigate — report to Director |
| Laminate Sheets   | Max 10% per project | Review cutting plan              |
| Veneer            | Max 12% per project | Review cutting plan              |
| Paint / Polish    | Max 5% per coat     | Check application method         |
| Sandpaper         | As per usage        | Monthly average tracked          |

■ Repeated excess wastage by a specific worker is a performance issue — escalated to Dept Head and Director. Deliberate damage or theft of materials results in immediate termination and wage deduction.

ATI-LSOP-2025 | SOP-L05 — TOOLS MANAGEMENT

Purpose

To maintain complete accountability of all factory tools — ensuring tools are available when needed, properly maintained, returned after use, and not lost, damaged, or misused.

Tool Categories

| Category              | Examples                                                                   | Custody                                                             |
|-----------------------|----------------------------------------------------------------------------|---------------------------------------------------------------------|
| Heavy Machines        | Panel Saw, Edge Bander, Boring Machine, CNC Router, Drill Press            | Factory property — operated in place. Dept Head accountable.        |
| Power Tools           | Cordless Drills, Jigsaw, Router, Belt Sander, Orbital Sander, Circular Saw | Issued per worker per day. Signed out and in.                       |
| Hand Tools            | Chisels, Hammers, Mallets, Hand Planes, Clamps, Squares, Measuring Tapes   | Assigned per worker. Each worker's set tagged with their Labour ID. |
| Polish Tools          | Spray Guns, Air Compressor, Sanders, Tack Cloths                           | Issued per polisher. Cleaned and returned daily.                    |
| Measuring Instruments | Vernier Calliper, Spirit Level, Steel Rule, Marking Gauge                  | Shared pool — signed out and in per use.                            |

Tool Issue & Return Procedure

|                       |                          |                                                                                                                                                                                                   |
|-----------------------|--------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 7:15 AM               | Tool Sign-Out            | Workers sign out their tools in the Tool Register (ATI-LF05) at the start of each day. Every item listed by name and ID tag. Dept Head witnesses sign-out.                                        |
| During Day            | Tool Care Responsibility | Each worker is responsible for tools signed out in their name. Tools must not be lent to other workers without Dept Head knowledge. Tools kept clean and in working condition throughout the day. |
| 6:45 PM               | Tool Return & Inspection | Workers return all tools to the tool storage area before sign-out. Dept Head or Store Keeper (Vibin) inspects each item: present, functional, no damage.                                          |
| 6:50 PM               | Sign-In Confirmation     | Vibin / Dept Head signs the Tool Register confirming return. Any missing or damaged tool is recorded immediately.                                                                                 |
| Missing Tool Protocol | Immediate Action         | Tool reported missing → Dept Head informs Afsal same day. Search conducted. If not found within 24 hours, cost deducted from worker's wage after Director approval. Worker informed in writing.   |

Damaged  
Tool  
Protocol

Damage Assessment

Dept Head assesses: accidental vs negligence. Accidental: factory bears cost, recorded in maintenance log. Negligence: partial or full cost deducted from worker wage, Director approves.

Tool Inventory Register — ATI-LF05

| Tool ID | Tool Name      | Category    | Condition | Assigned To<br>(Labour ID) | Sign Out<br>Time | Sign In<br>Time | Condition<br>on Return | Remarks |
|---------|----------------|-------------|-----------|----------------------------|------------------|-----------------|------------------------|---------|
| TL-001  | Cordless Drill | Power Tool  | Good      | ATI-C001                   | 7:15 AM          | 6:48 PM         | Good                   | —       |
| TL-015  | Spray Gun      | Polish Tool | Good      | ATI-P001                   | 7:20 AM          | 6:50 PM         | Cleaned                | —       |

Machine Operation Rules

- Heavy machines (Panel Saw, CNC, Edge Bander) operated ONLY by designated trained workers.
- No worker operates a machine they have not been trained on — Dept Head enforces this.
- Machine settings are not to be changed without Dept Head approval.
- Machine guards and safety covers must be in place at all times during operation.
- Any machine malfunction reported to Dept Head immediately — machine tagged 'OUT OF SERVICE' until repaired.
- Mohanan (Maintenance) responsible for daily machine cleaning and weekly lubrication check.

## ATI-LSOP-2025 | SOP-L06 — SPARES & TOOL ACCESSORIES MANAGEMENT

### Purpose

To maintain a controlled stock of tool spares and accessories — ensuring production is never halted due to unavailable consumables, while preventing wastage and pilferage of small items.

### Spares & Accessories Categories

| Category              | Items                                                                    | Stored By                      | Reorder Level              |
|-----------------------|--------------------------------------------------------------------------|--------------------------------|----------------------------|
| Cutting Accessories   | Saw Blades (panel/circular), Router Bits, Drill Bits, Jigsaw Blades      | Vibin (Store)                  | 2 units each               |
| Sanding Consumables   | Sandpaper (80/120/180/220 grit), Sanding Blocks, Sanding Sponges         | Vibin (Store)                  | 1 pack each grit           |
| Edge Banding Supplies | Edge Band Rolls (by colour), Glue Sticks for edge bander                 | Vibin (Store)                  | 2 rolls per active colour  |
| Polish Consumables    | Thinner, Hardener, Sanding Sealer, Wood Filler, Tack Cloth, Masking Tape | Vibin (Store)                  | Project-wise               |
| Fasteners             | Screws (all sizes), Dowels, Biscuits, Wood Glue, Construction Adhesive   | Vibin (Store)                  | 1 box per size             |
| Machine Spares        | Drive Belts, Bearings, Edge Bander Glue Pots, Compressor Filters         | Vibin (Store) — locked cabinet | 1 unit each critical spare |

### Issue & Consumption Tracking

|                                                                                                                          |                        |
|--------------------------------------------------------------------------------------------------------------------------|------------------------|
| <b>Step 1</b>                                                                                                            | <b>Request</b>         |
| Dept Head requests spares/accessories from Vibin specifying: item, quantity, project code.                               |                        |
| <b>Step 2</b>                                                                                                            | <b>Issue</b>           |
| Vibin issues and records in Spares Issue Register (ATI-LF06): date, item, qty, project code, issued to.                  |                        |
| <b>Step 3</b>                                                                                                            | <b>Usage Log</b>       |
| Dept Head records actual consumption at end of day in Material Usage Log (ATI-LF03).                                     |                        |
| <b>Step 4</b>                                                                                                            | <b>Reorder Trigger</b> |
| Vibin checks stock levels weekly. When stock hits reorder level, raises Purchase Request to Purchase Officer / Director. |                        |

### Critical Spare Management

Machine critical spares (belts, bearings, glue pots) are kept in a locked cabinet. Access only by Vibin or Dept Head. Usage logged every time a spare is used. Mohanan checks spare stock monthly and reports to Vibin.

### Monthly Spares Audit Checklist

| No. | Check Point                                                         | Done                     | Remarks |
|-----|---------------------------------------------------------------------|--------------------------|---------|
| 1   | All saw blades counted and condition checked — replace worn blades  | <input type="checkbox"/> |         |
| 2   | Router bits and drill bits inspected — replace chipped or dull bits | <input type="checkbox"/> |         |
| 3   | Edge banding rolls — count and reorder if below minimum             | <input type="checkbox"/> |         |
| 4   | Sandpaper stock counted per grit size                               | <input type="checkbox"/> |         |
| 5   | Polish consumables (thinner, hardener, sealer) — quantity checked   | <input type="checkbox"/> |         |
| 6   | Fastener stock (screws, dowels, glue) — replenish as needed         | <input type="checkbox"/> |         |
| 7   | Machine spare cabinet — all spares present and accounted for        | <input type="checkbox"/> |         |
| 8   | Compressor air filter checked and cleaned                           | <input type="checkbox"/> |         |
| 9   | Spray gun cleaned, gaskets checked                                  | <input type="checkbox"/> |         |
| 10  | Monthly spares report submitted to Afsal                            | <input type="checkbox"/> |         |

## ATI-LSOP-2025 | SOP-L07 — DAILY OUTPUT & PERFORMANCE TRACKING

### Purpose

To measure and record every worker's daily output — comparing actual production against assigned targets, identifying high performers, and addressing underperformance constructively.

### Daily Output Recording

|                                                                                                                                                    |                     |
|----------------------------------------------------------------------------------------------------------------------------------------------------|---------------------|
| Morning                                                                                                                                            | Target Set          |
| Dept Head assigns a measurable output target to each worker on the Task Card (ATI-LF02). Targets must be specific and quantifiable.                |                     |
| 5:00 PM                                                                                                                                            | Mid-Day Check       |
| Dept Head walks the floor. Records interim progress on Task Cards. Provides support or adjusts targets if genuine obstacles exist.                 |                     |
| 6:45 PM                                                                                                                                            | Output Recording    |
| Each worker reports their actual output to Dept Head. Dept Head verifies physically — counts units, checks stages completed. Records on Task Card. |                     |
| 7:00 PM                                                                                                                                            | Daily Output Report |
| Dept Head compiles the Daily Output Report (ATI-LF07) for all workers in their department. Submitted to Afsal by 7:15 PM.                          |                     |

### Daily Output Report Format — ATI-LF07

| Labour ID | Name   | Project    | Product  | Task     | Target   | Actual Output | % Achievement | Remarks            |
|-----------|--------|------------|----------|----------|----------|---------------|---------------|--------------------|
| ATI-C001  | Rahman | ATI-25-047 | Kitchen  | Assembly | 4 units  | 4 units       | 100%          | On target          |
| ATI-C002  | Suresh | ATI-25-047 | Wardrobe | Cutting  | 6 panels | 4 panels      | 67%           | Blade change delay |
| ATI-P001  | Ajith  | ATI-25-041 | TV Unit  | PU Final | 2 coats  | 2 coats       | 100%          | Excellent finish   |

### Weekly Performance Summary

Every Monday, Afsal compiles the previous week's performance for all workers:

| Labour ID | Name   | Days Present | Total Targets | Achieved | % Avg | Rating            | Action  |
|-----------|--------|--------------|---------------|----------|-------|-------------------|---------|
| ATI-C001  | Rahman | 6            | 18 tasks      | 17       | 94%   | Excellent         | Commend |
| ATI-C002  | Suresh | 6            | 18 tasks      | 12       | 67%   | Needs Improvement | Counsel |
| ATI-P001  | Ajith  | 5            | 15 tasks      | 14       | 93%   | Excellent         | Commend |

### Performance Ratings & Actions

| Rating                    | % Achievement     | Action                                                                                                                      |
|---------------------------|-------------------|-----------------------------------------------------------------------------------------------------------------------------|
| Excellent                 | 90–100%           | Verbal commendation. Considered for preference in project allocation.                                                       |
| Good                      | 75–89%            | No action required. Encourage consistency.                                                                                  |
| Average                   | 60–74%            | Dept Head counsels worker — identify obstacles. Monitor for 2 weeks.                                                        |
| Needs Improvement         | Below 60%         | Formal discussion with Dept Head and Afsal. Performance Improvement noted. If continued for 3 weeks — escalate to Director. |
| Consistent High Performer | 90%+ for 4+ weeks | Eligible for wage revision or bonus — Director's discretion.                                                                |

■ *Performance records are confidential and maintained by Afsal. Workers are given feedback respectfully and constructively. The goal is improvement, not punishment.*

### Productivity Benchmarks (Guidelines)

| Task                           | Worker Level     | Expected Daily Output        |
|--------------------------------|------------------|------------------------------|
| Modular Cabinet Assembly       | Master Carpenter | 4–6 units per day            |
| Panel Cutting (standard sizes) | Carpenter        | 40–60 panels per day         |
| Edge Banding (machine)         | Carpenter        | 50–80 running metres per day |
| Wardrobe Shutter Assembly      | Carpenter        | 6–10 shutters per day        |
| PU Polish — Full Unit          | Master Polisher  | 2–3 units (sealer + 2 coats) |
| Sanding (pre-polish)           | Polish Helper    | 8–12 panels per day          |
| Custom Furniture Assembly      | Master Carpenter | 1–2 complex units per day    |

ATI-LSOP-2025 | SOP-L08 — WAGE CALCULATION & PAYABLE

Purpose

To calculate daily wages accurately and transparently based on attendance, working hours, and agreed rates — and to process wage payments on time with complete documentation.

Wage Structure

|                 |                                                                                  |
|-----------------|----------------------------------------------------------------------------------|
| Working Hours   | 7:00 AM to 7:00 PM = 12 hours per day                                            |
| Wage Basis      | 1.5x Daily Wage Rate (standard 8-hr rate x 1.5 for the 12-hr shift)              |
| Daily Wage Rate | Individual agreed rate — recorded in Labour Register at the time of registration |
| Half Day        | Present for 6 hours or less = 0.75x daily wage                                   |
| Absent Day      | Zero wage                                                                        |
| Wage Cycle      | Weekly (every Saturday evening) — or as agreed with worker                       |
| Payment Method  | Cash / Bank Transfer / UPI — worker's preference recorded in register            |

Wage Calculation Formula

Daily Wage Payable = Daily Rate x 1.5 (for full 12-hour shift)

Weekly Wage = Sum of all daily wages for days present that week

Net Wage Payable = Weekly Wage – Advance Deductions – Any Damage Deductions

Example:

Daily Rate Agreed (8-hr basis) = ₹800

12-hr Shift Rate = ₹800 x 1.5 = ₹1,200 per day

Days Present (Mon–Sat) = 5.5 days (one half day)

Gross Weekly Wage = (5 x ₹1,200) + (0.5 x ₹1,200) = ₹6,000 + ₹600 = ₹6,600

Advance Deduction = ₹1,000

= NET PAYABLE = ₹5,600

Wage Calculation Sheet — ATI-LF08

Wage Payment Procedure

|                        |                                                                                                                                                                                                               |
|------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Every Saturday 5:00 PM | <b>Wage Sheet Prepared</b><br><br>Basith prepares wage calculation sheet for all workers using attendance register (ATI-LF01) and advance records (ATI-LF09). Sheet submitted to Director by 5:30 PM.         |
| Saturday 6:00 PM       | <b>Director Approval</b><br><br>Director reviews and approves the wage sheet. Any queries clarified with Afsal / Dept Heads before approval.                                                                  |
| Saturday 7:00 PM       | <b>Wage Payment</b><br><br>Basith processes payment — cash or transfer. Each worker receives a Wage Slip (ATI-LF08) showing breakdown: days, rate, gross, deductions, net paid. Worker signs acknowledgement. |
| Saturday 7:15 PM       | <b>Records Filed</b><br><br>Signed wage slips filed by Basith in worker-wise wage file. Monthly summary prepared and submitted to Director by 5th of following month.                                         |

■ Wages must be paid on time — every Saturday without fail. Delayed payment is a serious management failure. If payment is delayed for any reason, workers must be informed on Friday and a revised payment date committed.

## ATI-LSOP-2025 | SOP-L09 — ADVANCE PAYMENT MANAGEMENT

### Purpose

To manage advance salary requests from daily wage workers in a fair, documented, and controlled manner — ensuring workers' genuine needs are met while protecting the company from uncontrolled advance accumulation.

### Advance Policy

| Rule                  | Details                                                                                                              |
|-----------------------|----------------------------------------------------------------------------------------------------------------------|
| Maximum Advance Limit | Maximum advance outstanding at any time = 2 weeks gross wage                                                         |
| Frequency             | Maximum 1 advance request per week per worker                                                                        |
| Approval Authority    | Up to ₹2,000: Dept Head can approve. Above ₹2,000: Director approval required.                                       |
| Deduction             | Advance deducted from next Saturday wage payment. If amount large, deducted in equal parts over 2–3 weeks as agreed. |
| No Work — No Advance  | Workers on unapproved leave are not eligible for advance.                                                            |
| Documentation         | Every advance must have a signed Advance Request Slip — no verbal advances.                                          |
| Outstanding Limit     | If worker already has outstanding advance equal to 2 weeks wage, no further advance until partially cleared.         |

### Advance Request Procedure

|                                                                                                                                                      |                          |
|------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------|
| <b>Step 1</b>                                                                                                                                        | <b>Worker Requests</b>   |
| Worker submits Advance Request Slip (ATI-LF09) to Dept Head — amount, reason, requested date.                                                        |                          |
| <b>Step 2</b>                                                                                                                                        | <b>Dept Head Review</b>  |
| Dept Head checks: outstanding advance balance, reason, worker's attendance record. Approves up to ₹2,000 or forwards to Director for higher amounts. |                          |
| <b>Step 3</b>                                                                                                                                        | <b>Director Approval</b> |
| For amounts above ₹2,000, Director reviews and approves or rejects. Decision communicated same day.                                                  |                          |
| <b>Step 4</b>                                                                                                                                        | <b>Payment</b>           |
| Basith processes advance payment after receiving approved slip. Cash or UPI. Worker signs Advance Register (ATI-LF10) on receipt.                    |                          |
| <b>Step 5</b>                                                                                                                                        | <b>Deduction at Wage</b> |
| Advance deducted from Saturday wage as per agreed schedule. Deduction shown on Wage Slip. Worker confirms.                                           |                          |
| <b>Step 6</b>                                                                                                                                        | <b>Advance Cleared</b>   |
| Once advance fully recovered, Advance Register updated. Worker eligible for fresh advance if needed.                                                 |                          |

| Labour ID | Name   | Advance Date | Amount (₹) | Approved By | Balance Before | Deducted On | Amount Deducted | Balance After | Fully Cleared |
|-----------|--------|--------------|------------|-------------|----------------|-------------|-----------------|---------------|---------------|
| ATI-C001  | Rahman | DD/MM/YY     | ₹1,500     | Raees       | ₹0             | DD/MM/YY    | ₹1,500          | ₹0            | Yes           |

■ Advance Register is reviewed by Basith and Director monthly. Workers with chronic high advances are counselled by Afsal. The advance system exists to support workers in genuine need — not as a regular salary supplement.

## ATI-LSOP-2025 | KPI FRAMEWORK — DAILY WAGE LABOUR

### Individual Worker KPIs

| KPI                      | Measurement                                  | Target                              | Review Frequency      |
|--------------------------|----------------------------------------------|-------------------------------------|-----------------------|
| Daily Output Achievement | Actual vs target output per day              | Minimum 80% of assigned target      | Daily                 |
| Attendance Rate          | Days present / total working days            | Minimum 90% per month               | Monthly               |
| Material Wastage         | Actual wastage vs benchmark                  | Within acceptable wastage %         | Per project           |
| Tool Return Compliance   | Tools returned on time and in good condition | 100% — zero missing tools           | Daily                 |
| Quality of Output        | Units passing QC2 without rework             | Minimum 95% pass rate per worker    | Per project / Monthly |
| Task Card Completion     | Task cards filled completely and correctly   | 100%                                | Daily                 |
| Zero Damage / Loss       | Incidents of tool damage or material damage  | Zero negligence incidents per month | Monthly               |

### Department-Level KPIs (Raees / Shafeer)

| KPI                          | Measurement                                      | Target                           | Review    |
|------------------------------|--------------------------------------------------|----------------------------------|-----------|
| Department Output Rate       | Units completed vs planned per week              | Minimum 85% weekly plan achieved | Weekly    |
| Labour Utilisation           | Productive hours / total hours paid              | Minimum 85%                      | Weekly    |
| Attendance Report Timeliness | Submitted to Afsal by 7:15 PM daily              | 100% on-time                     | Daily     |
| Output Report Timeliness     | Daily output report by 7:15 PM                   | 100% on-time                     | Daily     |
| Zero Unauthorised Tool Loss  | Tools reported missing or stolen                 | Zero per quarter                 | Quarterly |
| Wastage Rate per Department  | Monthly material wastage vs benchmark            | Within target %                  | Monthly   |
| Performance Counselling      | Underperforming workers counselled within 1 week | 100% action taken                | Weekly    |

### Payroll KPIs (Basith / Afsal)

| KPI                     | Target                                       |
|-------------------------|----------------------------------------------|
| Wage Payment Timeliness | 100% of wages paid every Saturday by 7:00 PM |

| KPI                        | Target                                                                      |
|----------------------------|-----------------------------------------------------------------------------|
| Wage Calculation Accuracy  | Zero errors in wage calculation — cross-checked against attendance register |
| Advance Register Currency  | Updated same day as every advance issued or deducted                        |
| Monthly Labour Cost Report | Submitted to Director by 5th of every month                                 |
| Wage Slip Distribution     | 100% workers receive signed wage slip on payment day                        |

Monthly Labour Performance Dashboard — Submitted to Director

| Metric                              | This Month | Last Month | Trend |
|-------------------------------------|------------|------------|-------|
| Total Labour Days (All Workers)     |            |            |       |
| Total Wage Paid (■)                 |            |            |       |
| Average Output Achievement (%)      |            |            |       |
| Average Attendance Rate (%)         |            |            |       |
| Total Material Wastage (■ value)    |            |            |       |
| Tools Lost / Damaged                |            |            |       |
| Workers rated Excellent (%)         |            |            |       |
| Workers on Performance Watch        |            |            |       |
| Total Advances Outstanding (■)      |            |            |       |
| QC2 Rework attributed to Labour (%) |            |            |       |

## ATI-LSOP-2025 | SECTION 12 — FORMS & REGISTERS INDEX

| Form Code | Form Name                            | Used In       | Maintained By        | Frequency               |
|-----------|--------------------------------------|---------------|----------------------|-------------------------|
| ATI-LF01  | Daily Attendance Register            | SOP-L01       | Raees / Shafeer      | Daily                   |
| ATI-LF02  | Task Card                            | SOP-L02 / L03 | Dept Head            | Daily per worker        |
| ATI-LF03  | Material Usage Log                   | SOP-L04       | Dept Head            | Daily                   |
| ATI-LF04  | Wastage Log                          | SOP-L04       | Dept Head            | Per incident            |
| ATI-LF05  | Tool Sign-Out / Sign-In Register     | SOP-L05       | Vibin / Dept Head    | Daily                   |
| ATI-LF06  | Spares Issue Register                | SOP-L06       | Vibin                | Per issue               |
| ATI-LF07  | Daily Output Report                  | SOP-L07       | Raees / Shafeer      | Daily                   |
| ATI-LF08  | Weekly Wage Calculation Sheet & Slip | SOP-L08       | Basith               | Weekly                  |
| ATI-LF09  | Advance Request Slip                 | SOP-L09       | Dept Head / Director | Per request             |
| ATI-LF10  | Advance Register                     | SOP-L09       | Basith               | Per advance / deduction |
| ATI-LF11  | Labour Register (Master)             | Section 1     | Afsal                | On joining / update     |
| ATI-LF12  | Monthly Labour Performance Dashboard | KPI Section   | Afsal                | Monthly                 |

■ All forms are mandatory. Digital versions (Excel/Google Sheets) are preferred for wage calculation sheets and advance registers. Physical signed copies must be maintained for attendance, task cards, and wage slips.

| Role                      | Name    | Signature | Date |
|---------------------------|---------|-----------|------|
| Head of Wood Working      | Shafeer |           |      |
| Head of Modular Furniture | Raees   |           |      |
| Admin & Project Coord.    | Afsal   |           |      |
| Accounts Head             | Basith  |           |      |
| Director                  | Yaseen  |           |      |
