

APPLETREE ERP — UAT USER GUIDE

(UAT / Demo version. This environment is for testing only — see Part 57 of `APPLETREE_ERP_SOP.md`.)

What UAT means here

UAT = User Acceptance Testing. You are being asked to try the ERP yourself, using fake/demo data, and tell us honestly whether it works the way a real Apple Tree employee would expect. Nothing you do here touches real company money, customers, or records.

How to get access

Depending on how you were given access:

- **A shared network address** (e.g. `http://192.168.x.x:4001`) — just open it in your browser.
- **An offline zip file** — extract it and double-click `Start ERP.bat`.

If you're not sure which, ask whoever sent you this guide.

Logging in

Use one of the dedicated test accounts:

Role	Username	Password
Admin	<code>uat_admin</code>	<code>Uat@Admin1</code>
CEO	<code>uat_ceo</code>	<code>Uat@Ceo123</code>
Finance Manager	<code>uat_finance</code>	<code>Uat@Fin123</code>
Accountant	<code>uat_accountant</code>	<code>Uat@Acc123</code>
Purchase	<code>uat_purchase</code>	<code>Uat@Pur123</code>
Site In-charge	<code>uat_site</code>	<code>Uat@Site123</code>
Store (<i>mapped to Purchase — see note below</i>)	<code>uat_store</code>	<code>Uat@Store123</code>
Project Manager	<code>uat_project</code>	<code>Uat@Proj123</code>
Factory (<i>mapped to Purchase — see note below</i>)	<code>uat_factory</code>	<code>Uat@Fact123</code>
Sales	<code>uat_sales</code>	<code>Uat@Sales123</code>

Note: this ERP doesn't currently have separate "Store" or "Factory" login roles — those two test accounts use the Purchase role underneath, since that's what actually controls warehouse/GRN and factory screens today. This is disclosed, not hidden.

You'll see a red **"UAT / DEMO ENVIRONMENT"** banner at all times — that's confirmation you're in the right, safe place.

See a working example first

Log in as `uat_admin`, go to **ADMIN** → **Users & Roles**, and click **Create Demo Scenario**. This builds one complete, real, connected example — a project all the way through a purchase, a controlled payment, and site material use — so you have something real to explore before creating your own test data.

What to actually test

Work through the numbered files in `ACCOUNTANT_UAT_PACKAGE/`, starting with `01_UAT_GUIDE.md`. There are 117 real test scenarios across Finance, Procurement, Inventory, Site, Project, Job Work, Payment Controls, Security, and Reconciliation.

Testing something that needs more than one person

Some real controls (like a payment needing three different people: maker, checker, executor) need you to act as more than one role. If you're testing alone, simply **log out and log back in** as a different `uat_*` user for each step — the system will still correctly refuse if you try to approve or execute your own request, proving the control is real even when one person is cycling through the roles.

Result codes — use these, don't just write "it worked"

- **PASS** — did exactly what you expected.
- **FAIL** — did something wrong, crashed, or gave a wrong number.
- **CONFUSING** — worked, but you had to guess, or the wording was unclear.
- **BUSINESS POLICY REQUIRED** — the system correctly told you a real decision hasn't been made yet (this is not a bug).

Reporting a problem

Use `ACCOUNTANT_UAT_PACKAGE/20_DEFECT_REPORT_TEMPLATE.md`. Be specific: what you did, what you expected, what actually happened.

When you're finished

Fill in `ACCOUNTANT_UAT_PACKAGE/14_UAT_RESULT_TEMPLATE.md` for each test, and `ACCOUNTANT_UAT_PACKAGE/21_UAT_SIGNOFF.md` once for the whole session. Give both back to whoever is coordinating this UAT.

Starting over

An Admin can click **Reset UAT Data** (Admin → Users & Roles) at any time to wipe test data and start clean. This has no effect on any real Apple Tree system — this environment has never had a connection to one.

What NOT to do

- Don't enter any real Apple Tree customer, supplier, or financial data here.
- Don't use any of these passwords anywhere real.
- Don't assume anything you do here is a real transaction, no matter how complete it looks on screen.
